## SERVICES

EIS undertakes projects from design to completion ensuring every aspect of the electrical installation is completed to the highest standards.

Our range of services and experience span the full range of electrical systems and include data and phone systems, digital CCTV, fire alarms, emergency lighting, security systems, designing installations, project managing as well as maintenance, testing and inspecting and much more.

## EXPERIENCE

We have been involved in many key contracts across the West Country responsible for complete projects that include just about every form of electrical system, including lighting power, data, CCTV, etc.

This responsibility for the successful completion of all these major projects on time, on budget with full certification over a significant number of years has given us a clear understanding and considerable experience over all fields.

## HISTORY

Established within the industry for over 19 years, working solely or as part of a team all across the country - undertaking projects from agricultural, exhibitions, commercial and industrial, recently having completed several years designing and managing installations for a number of upmarket clubs and restaurants.

In nearly 20 years, we have worked in every major field and have gained a considerable reputation for reliability, creativity, and speed.

## PROJECTS

We work on any size of project from individual through to national multi installations. Recent projects have included a number of clubs, restaurants and bars in and around the Bristol area. this has involved working alongside designers, creative lighting companies and club lighting and sound engineers.

Working within tight guidelines and as part of a team has proved invaluable even when undertaking more mainstream projects.

## CERTIFICATION & HEALTH & SAFETY

All work is carried out with ECA and Part P approval EIS is working in conjunction with a Nacoss gold certified installer.

Our Health and Safety policy is available on request.
